

SHIPYARDS

One Team, One Vision

HIDRAMAR GROUP HOLDING COMPANY

We started in the 80s as a family-owned repair hydraulic workshop in Las Palmas Port. Hidramar Group soon became recognized in the region for its quality service, its commitment to the clients and its cost-effective policy.

As the requirements of the clients challenged us, we developed a broad variety of shipyard in-house services, expanded our facilities and built a qualified team to set our brand as the most efficient shipyards in the region.

VISION & MISSION

Our vision

To become the preferred shipyard partner in the Atlantic Ocean for the Global Energy and Marine industry.

Our mission

To provide cost-effective and efficient offshore project management, marine engineering, fabrication and high quality shipyard services to our valued clients globally.

QUALITY, HEALTH, SAFETY, ENVIRONMENT AND SUSTAINABILITY

Hidramar Group operates a comprehensive integrated quality and HSE management system. We are constantly seeking to improve and to ensure that our organizational structure keeps up with other leading international companies standards.

Our quality Management System is based on ISO 9001:2015, our Health and Safety Management System is based on ISO 45001 and our Environmental Management System is based on ISO 14001:2015, all certified by Lloyd's Register.

As our people is the heart of our business,
our commitment goes further.

Diversity, gender Equity and social Inclusion

It is not just an aim, but a global business policy. It is about our Group welcoming the talents and ideas of people with different backgrounds, experiences, and attitudes to encourage our continued success in providing clients with the high-quality service they deserve.

Global Responsibility & Sustainability

Our team consciously works together to protect the environment and have a positive impact on the communities where we live and work.

We support internship programs that allow us to collaborate with local and international universities, improving opportunities to young people.

Hidramar Group Green

We continuously work to recognize and promote more sustainable alternatives through operational efficiencies, all in an effort to manage and reduce Shipyard's effect on the environment.

HIDRAMAR SHIPYARDS

Reina Sofia (ISPS), Las Palmas de Gran Canaria

Hidramar Shipyards secure world-class ISPS quayside facility located at Reina Sofia Quay in Las Palmas de Gran Canaria offers a deep water berth line capable to accommodate up to post panamax size vessels, alongside pipe and steel fabrication workshops, 18 m water depth at quay, with in-house crane availability up to 600 tons.

Free-Trade Zone, Las Palmas de Gran Canaria

Hidramar Group's early steps were developed in the free trade zone located within the concurred Las Palmas Port. Just 800 meters from our deep water base, well-capable hydraulics, machining and mechanical workshops and extensive logistics yards are in place to deliver a broad variety of services for the naval and energy sectors.

TENERIFE SHIPYARDS

Free Trade Zone at Dique del Este, Santa Cruz de Tenerife

Tenerife Shipyards management office and workshops are located in the deepwater and well-sheltered port of Santa Cruz de Tenerife, with direct waterfront access for shipyards operations. Tenerife shipyards offers 480 m of quayside, outstanding fabrication capabilities and specialized hydraulics & mechanical workshops.

Muelle de Rivera Granadilla Port

Tenerife Shipyards, with 300 m of quayside and a yard over 35.000 meters, is located just 10 Km from an international airport, ideal for heavy logistics, mob/demobilisation projects. This new Port offers a unique set-up with deep water piers and thousands of meters of yard space for a great scale project execution. Tenerife Shipyards has been delivering several projects at this location over the last few years and is currently investing to set a world-class base to keep expanding its shipyard capabilities while becoming a world reference for Panamax dry-docking and offshore asset fabrication.

POWERFUL ENGINEERING AND DESIGN

We deliver turnkey solutions since the feasibility study up to the final commissioning. Relying in our inhouse 3D Scanning and modeling, Solid Works Model and Design, Structural analysis and Detailed Engineering.

While the execution, our project management, cost controller and procurement team efficiently drive our efforts until the successful delivery. Without mattering the SOW complexity, our multidiscipline engineering team makes the difference by covering all the branches related to the naval and Oil & Gas sectors.

A combination of know-how, cutting-edge technologies, outstanding facilities and full commitment to safety and quality standards are the strengths of our Engineering Department. As the major demand of the naval sector is swift and effective solutions, engineering is essential to successfully undertaking any project safely all the way through, within the expected time and the allotted budget.

HYDRAULICS SERVICES

The name of our group comes from our background as a hydraulic workshop. After 30 years we have grown relying on that same workforce that positioned us as the reference on Hydraulics all over West African Region, delivering since our beginnings reliable services to the fishing fleet and now at days also to the Oil and Gas and Mining industries.

We have outstanding workshops facilities equipped with high-tech precision machinery, a chrome surface treatment plant, and operated by our experienced technicians and engineers, capable of designing and fabricating hydraulic systems, troubleshooting, repairs, testing, certifications, etc. Decades of networking in hydraulics, together with major manufacturers and providers, have set in place the best capacities to procure the right solutions where are most needed, as our ridding team can go onboard wherever suits our demanding clients better.

HULL REPAIRS

Afloat time-efficient, temporary or permanent afloat hull repairs for those who operate in our region.

We have attained the trust of our great clients due our in-house strategy has proven to be the asset to commit prompt delivery and efficient solutions working 24/7.

The fact of having an extensive and multi-skilled payroll, that covers all the specialities involved on these repairs, allow us to deliver time efficient services safely and guaranteeing the highest quality standards.

VESSEL HARDENING

We understand the risk your vessels go through traveling across risk areas, we offer a turnkey solution to protect your ship. A well-hardened ship will deter and stop a piracy attack.

Our experienced and highly qualified team will complete your anti-piracy barrier systems in accordance with the best management practices BMP.

BOLLARD PULL TEST

Our Shipyards services also include the Bollard Pull test, which measures the pulling or towing power of watercraft, to ensure the proper operation of the equipment.

Our locations in West Africa have outstanding advantages for bollards pull test in West Africa, as we can perform tests up to 300T.

SHIPYARD IN A BOX SOLUTIONS

The connectivity to our strategic location enables us to deliver reliable services where they are most needed.

Since our origins, we have deployed our technicians where the assets are to bring certainties and guarantees all over the region.

Remote cooperation with our clients and mobile workshops supports our multiskilled workforce to bring everywhere the same solutions as we deliver within our shipyards.

This allows our clients to save time and expenses, which are one of our main goals.

By having a robust team is in possession of the seaman books and BOSIET certifications, and they can provide a wide range of services offshore, such as structural repairs, pipe works, hydraulics, electrical, mechanical troubleshooting, portable machining services, scaffolding, painting, rope access services and load tests campaigns and lifting gear certifications

STRATEGIC LOCATION

No matter how far we keep developing, our strategic location will always be our greatest asset. Outstanding capabilities, our project management processes, in-house services, and quality standards positioned Hidramar Group as a regional reference.
